

Commercial TerraPro®

Soil Activator – Soil Probiotic

Balances your soil, supporting optimum Soil Health

Healthy Soil is essential if you are attempting to establish vegetation for erosion control, parks, sports fields, brown field reclamation, or a home garden as only a healthy soil can grow a healthy plant. Everything that's good that must happen in the soil depends on the right amount of water and oxygen in the soil along with a healthy ecology of beneficial microbes and a Carbon Matrix of soil carbon.

The proprietary Carbon Matrix of TerraPro combines beneficial bacteria and mycorrhizal fungi to help support healthy plant growth, putting your soil on the journey to better health. This mix will support a healthy soil by improving the structure of your soil, introducing beneficial microbes, and improving the porosity of soil. TerraPro works with all crops, trees, ornamentals, turf and garden vegetables. In field trials on the Nations largest farms its been shown to decrease soil compaction, improve water and oxygen penetration and increase the soils biota of beneficial microbes.

Ingredients: Purified Carbon from Oxidized Lignite, protein, algae, liquefied compost with enzymes (SUPRAPLEX), Soil Secrets brand BIOpack - Soil Probiotic, Soil Secrets brand EndoMaxima mycorrhizal fungi.

Application Rate:

Apply one bag covering 1000 sq. ft. or 44 bags per acre. Product can be top-dressed onto the surface and watered in, or lightly cultivated into the top ¼" to ½" inch. Going deeper may be necessary for Petroleum Hydrocarbon remediation, Salinity treatment and Sodium remediation. For best results also apply ½ bag of **Protein Crumbles** per 1000 square foot area, 22 bags per acre after you apply the TerraPro.

Direction for Use: Top dress or cultivate into the soil, followed by irrigation after applying. If flood irrigating, cultivating into the soil is ideal. TerraPro can either be used as a stand alone product on all landscapes, farms, or gardens or combined with our **Protein Crumbles**. Can also be used on all house plants at 1 teaspoon per 1 gallon size pot, top-dressed, or mixed into potting soil at 5% of mix weight.

Not for human, livestock or pet consumption.
